AGRICULTURAL STATISTICS, IRELAND, 1912.

**RETURN OF PRICES OF CROPS, LIVE STOCK
AND OTHER IRISH AGRICULTURAL
PRODUCTS.**

TO THE
SECRETARY OF THE DEPARTMENT OF AGRICUL-
TURE AND TECHNICAL INSTRUCTION FOR
IRELAND.

SIR,

I have the honour to submit the following Report on the prices in Ireland of Irish live stock and other agricultural products for the year ended 31st December, 1912. Tables are submitted with the Report, showing the average prices for the twenty years, 1893-1912, while the quarterly average prices during 1912 are also set forth in separate tables.

A continuous official record of Prices obtained in Ireland for Irish Live Stock and other Agricultural Products is available for each year since and including 1881. Unofficial records of these prices were kept and published for years prior to 1881, and in Appendices II. and III. (pp. 88-95) of the Department's Return of Prices for the year 1906-7 some of the prices in these records were brought together in a manner convenient for reference. These unofficial prices were republished in the Returns of Prices for the years 1907-8, 1908-9, and 1910.

In order to obtain a correct idea of the relative importance to the Irish farming community of a change in price of any class of live stock or commodities dealt with in this Report, it would be necessary to have information as to the number or quantities sold by the Irish farming community taken as a whole, sales to Irish farmers being excluded. No such information is at present published, and such sales are most difficult even to estimate. A rough idea, however, can be obtained as to the effect of changes in prices of Cattle, Sheep, Pigs, Wheat, Oats, Barley, Potatoes, Hay, and Flax from the following figures, which are taken from the Department's General Abstracts of Tillage and Live Stock (Cd. 6375/12) and preliminary Produce Leaflets, and which shows the numbers of Cattle, Sheep, and

Swine in Ireland on the 1st June, 1912, and the total production of Wheat, Oats, &c., in Ireland in 1912"—

Cattle,	4,848,498	head
Sheep,	3,828,829	"
Pigs,	1,323,957	"
Wheat,	837,826	cwts.
Oats,	19,104,975	"
Barley,	3,110,924	"
Potatoes,	2,546,710	tons
Hay,	5,005,591	"
Flax,	2,067,527	stones (14lbs.)

Deductions as to the relative importance of changes in prices must be drawn with great caution from these figures. For instance, a change in the price of Oats, Potatoes, or Hay will not have the importance to Irish farmers that these figures would suggest, as the greater part of the Irish production of these commodities is fed to live stock in Ireland. A rise in the prices of these would help the tillage farmer who has a surplus for sale, but would add to the difficulties of raisers of live stock who have to buy these commodities.

The main changes which have taken place respectively in the prices of crops, live stock, and other agricultural produce during the previous sixty years were traced in the Report for 1906-1907.

In the present report the only prices referred to are those recorded during the twenty years 1893-1912, inclusive. Later in this report the movements of the particular commodities will be noticed in detail, but here it is well

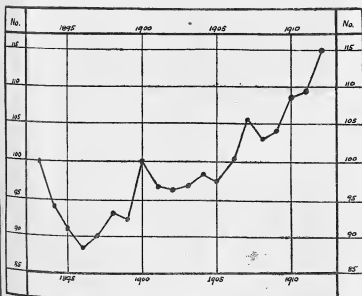

to get a quick general idea of the state of prices in 1912 as compared with the previous nineteen years. The prices obtained in 1912 were not exceeded in any of the previous nineteen years in the case of Oats; Barley; Store Cattle, two to three years old; Beef, and Eggs. Prices were only exceeded in one year in the case of Potatoes, Store Cattle, one to two years old, and Butter; in two years in the case of Wheat, Flax, and Pork; in three years for Springers; in four years for Wool; in five years for Hay, and Store Cattle over three years old, and in seven (out of eighteen) years for Grass Seeds. The prices, however, for Store Sheep and Mutton were extremely unsatisfactory. In none of the previous nineteen years was the price of Store Sheep, two years old and over, so low, and the price of Store Sheep, one to two years old, was only lower in three years (1893, 1896, and 1902), the price of Store Lambs was lower in only five years, and of mutton only lower in ten years. The general range of agricultural prices, however, was very satisfactory in the year 1912. The effects of the outbreak of Foot and Mouth Disease on the prices of Irish Stock is referred to later on in this Report.

It must, however, be borne in mind that although the prices of agricultural produce have increased considerably during the last twenty years, the farmers' expenses have also increased greatly. The value of gold has been decreasing, or, to put it otherwise, the general range of prices, agricultural and other than agricultural, has been increasing since

DECREASED VALUE OF
GOLD SINCE 1896.

the year 1896. A change in the purchasing power of money is measured by several systems of "Index Numbers." The system adopted by the Board of Trade takes account of the prices of forty-five principal commodities, including Food Stuffs (Corn, Potatoes, Meat, Sugar, &c.), Coal and Metals, Textile Raw Materials, and other commodities, *e.g.*, Timber, Bricks, &c. Each of the commodities is "weighted" according to its importance; the prices for each year multiplied by the weights are added together, and the result reduced to a percentage of the total for the year 1900. The following diagram has been constructed from the "Index Numbers" adopted by the Board of Trade, and shows at a glance the change in the general range of prices of commodities, agricultural and other than agricultural, during the last twenty years.

Diagram showing the "Index Numbers" of Wholesale Prices for the twenty years 1893-1912, as calculated by the Board of Trade—

The "Index Numbers" for these years were—

1893—100.0	1900—100.0	1907—105.7
1894—94.2	1901—96.9	1908—102.8
1895—91.0	1902—96.5	1909—104.0
1896—88.2	1903—96.9	1910—108.7
1897—90.1	1904—98.3	1911—109.3
1898—98.2	1905—97.6	1912—115.0
1899—92.3	1906—100.4	

and show that goods that cost £4 8s. in 1896 could only be purchased for £5 15s. in 1912.

AVERAGE PRICES OF CROPS, LIVE STOCK, &c.

The following two tables show the average prices of (1) Farm Crops and (2) Live Stock, Meat, &c., for the year 1912 compared with 1911, and the average prices for the two decades, 1892-1901 and 1902-1911 :—

* No quotations prior to 1893.

These tables show that taking everything into account, it may be said that the level of the prices of Irish agricultural products

in 1912 was very favourable, as compared with recent years, but, as stated above, the purchasing power of money has fallen considerably since 1896. Comparing the prices recorded for 1912 with those for 1911, it is found that some have increased, while others have decreased. There was a rise in the prices of Wheat, Oats, Barley, Potatoes, Grass Seeds, Beef, Mutton, Pork, Butter, Eggs and Wool; but a fall in the prices of Hay; Flax; Store Cattle, and Store Sheep. A more detailed statement, with comparisons of the movement of prices of Crops, Stock, and Dairy Produce during the year 1912 is made in the following paragraphs.

I. CROPS.

Prices of Sales of the Irish Wheat Crop harvested in 1911 were recorded up to February 3rd, 1912, the
WHEAT. average price from the 1st January, 1912, to the close of the sales being 8/3 per cwt., as compared with 7/0½ for the corresponding period of 1911. The area sown in 1912 was 44,855 acres as against 45,056 in 1911. The average yield was lower (18·7 cwt. per statute acre as against 19·7 cwt. in 1911), and the total produce showed a decrease from 887,188 cwt. in 1911 to 837,826 cwt. in 1912. Sales of the new grain commenced in the first week of September, the prices realised being considerably higher than in 1911. The average price for the quarter ended 30th September, 1912, was 8/-, as against 7/5½ in 1911. During the quarter ended 31st December, prices showed a decrease, the average being 7/8½ in 1912, as compared with 7/9½ in the same quarter of 1911. The yearly average price for 1912 amounted to 7/9½, as against 7/5½ in 1911, and was considerably above the average during the past twenty years, and was never exceeded in any of these years except 1907 and 1908.

Prices of Irish Oats harvested in 1911 were recorded continuously up to the last week in August, 1912, after which the new crop began to be marketed. The area sown with Oats increased from 1,040,185 acres in 1911 to 1,046,000 in 1912, the yield from 16·8 cwt. per acre to 18·3 cwt., and the total produce from 16,916,416 cwt. to 19,104,975 cwt. The average price of Oats (White and Black) for the year was 6/10½ per cwt., and is the highest price recorded.

In the quarter ended 31st March, 1912, the average price of White Oats was 7/5½, as against 5/10½ in the corresponding quarter of 1911. Prices rose in the quarter ended 30th June, and averaged 8/8, as against 6/7 in the corresponding quarter of 1911. The prices in the third and fourth quarters were 7/6½ and 6/11½, respectively, as against 6/4½ and 7/0½ in the corresponding quarters of 1911. Taking the average for the year 1912, the price of White Oats amounts to 7/3½, as compared with a like average of 6/6 in 1911, and of 6/2½ for the ten-yearly period, 1902-1911.

The price of black oats for the quarter ended 31st March averaged $6/10\frac{1}{2}$ per cwt., as against $5/7\frac{1}{2}$ in 1911; for the quarter ended 30th June, 1912, the price was $7/8\frac{3}{4}$, as against $6/4$ in 1911. For the quarter ended the 30th September, 1912, the price was $6/4\frac{1}{4}$, as against $5/10\frac{3}{4}$ in 1911; and for the December quarter, $6/3$, as against $6/2\frac{1}{2}$ in 1911. The average for the year 1912 was $6/4\frac{3}{4}$, as compared with $5/11\frac{3}{4}$ in 1911, and $5/5\frac{1}{4}$ for the ten-yearly period, 1902-1911.

The area under barley in Ireland in 1912 was 165,867 acres, as against 158,180 acres in 1911. The average yield per acre was 18'8 cwt. in 1912, as compared with 19'2 cwt. in 1911; and the total produce 3,110,924 cwt. in 1912, as against 3,042,238 cwt. in 1911. Sales opened in the second week of September, and prices realised were satisfactory. The average price for the year was 8/7 per cwt., and was not exceeded in the previous nineteen years. The average price for the quarter ended 30th September, was $7/7\frac{1}{4}$, as against $7/1\frac{1}{2}$ in the same quarter of 1911; and in the last quarter $8/9\frac{1}{4}$, as compared with $7/5\frac{1}{2}$ for the last quarter of 1911.

The acreage under potatoes in Ireland increased from 591,259 acres in 1911 to 595,184 acres in 1912; there was, however, a substantial decrease in the average yield per acre, which fell from 6'2 tons in 1911 to 4'3 tons in 1912, with the result that the total produce of sound tubers decreased from 3,694,856 tons in 1911 to 2,546,710 tons in 1912. The average price recorded for 1912 was $3/6\frac{3}{4}$ per cwt., and only once exceeded in the previous nineteen years—in 1907, when the price was $3/11\frac{1}{4}$ per cwt. The prices obtained in the first, second, third and fourth quarters of the year were $3/2\frac{3}{4}$, $3/7\frac{1}{4}$, $3/6\frac{3}{4}$, and $3/10\frac{3}{4}$ respectively; as compared with $3/5\frac{1}{4}$, $4/2\frac{1}{4}$, $3/5$, and $2/10\frac{1}{4}$ in the corresponding quarters of 1911. Accordingly, the average price for each of the first two quarters was lower, but for each of the last two quarters was higher, than in 1911. The highest price recorded for the year 1912, as shown on page 33, was $13/4$ per cwt., but this was, of course, a price realised for early potatoes marketed in June. The prices of early potatoes are taken into account in calculating average prices, but as the quantities recorded are small and as high prices are realised only for a few weeks these high prices do not appreciably affect the average prices.

The acreage under hay in Ireland decreased from 2,512,403 acres in 1911 to 2,487,349 acres in 1912, but the total produce increased from 4,474,567 tons in 1911, to 5,005,591 tons in 1912. The price recorded for 1912, though lower than in 1909, 1910, and 1911, was only exceeded in five of the nineteen years, 1893-1911. The prices per cwt. obtained for clover hay in the first, second, third and fourth quarters of 1912 were $3/10$, $3/7\frac{1}{4}$,

$3/0\frac{1}{2}$, and $3/4\frac{1}{4}$ respectively; as compared with $3/5\frac{1}{2}$, $3/8\frac{1}{2}$, $3/1\frac{1}{4}$, and $3/11$ in 1911. And for meadow hay, $3/2$, $2/7\frac{1}{2}$, $2/4\frac{3}{4}$, and $2/4$; as compared with $2/4\frac{1}{2}$, $2/1\frac{1}{4}$, $2/8$, and $3/3$ in 1911. Accordingly, prices in the first two quarters for clover and meadow hay were better, but in the last two quarters worse, than in 1911.

The average annual prices of grass seeds, which increased in 1907, 1908 and 1909, decreased in 1910 and 1911. The average price in 1912 was practically the same as in 1911, being $12/2\frac{1}{2}$ per cwt., as compared with $12/2\frac{1}{4}$ in 1911, and $11/11$ for the average of the ten years 1902-1911. The price of perennial rye-grass seed was lower in each quarter of 1912 than in the corresponding quarter of 1911, while the prices of Italian were higher. For the quarter ended 31st March, the price of perennial was in 1912 $11/10\frac{3}{4}$ per cwt., as against $13/11\frac{1}{4}$ in 1911; for the quarter ended 30th September, the price of perennial averaged $11/10$ in 1912, as against $12/5\frac{1}{4}$ in 1911; for the quarter ended 31st December, the average price of perennial was $11/10\frac{3}{4}$, as against $12/2\frac{1}{2}$ in 1911. The prices of Italian rye-grass seed for the third and fourth quarters of 1912 were, respectively, $16/7$ and $16/11$, as compared with $16/-$ and $15/8$ for 1911.

The area under flax in Ireland decreased from 66,618 acres in 1911 to 54,981 acres in 1912. The average yield of scutched fibre per statute acre, however, was very satisfactory, being 37·6 stones, as compared with 27·0 stones in 1911. The total produce of the scutched fibre increased from 1,798,481 stones in 1911, to 2,067,527 stones in 1912. The prices realised in 1912 were very satisfactory, the average for the year being $8/1\frac{1}{2}$ per 14 lbs. This price, though lower than the average prices 1910 and 1911, was not exceeded in any of the seventeen years, 1893-1909. The price for the quarter ended 31st March was $7/11\frac{1}{4}$, as compared with $10/2\frac{1}{4}$ in 1911; for the quarter ended 30th September, the price was $8/6\frac{1}{4}$, as compared with $8/3\frac{1}{4}$ in 1911; and in the last quarter of the year the price was $8/2\frac{1}{2}$, as compared with $8/1$ in 1911.

II. LIVE STOCK AND OTHER PRODUCE.

The prices of fat cattle were, on the whole, very satisfactory in 1912. The average price per cwt., live weight, of fat cattle sold in the Dublin Market in 1912 was $34/4$, and was not exceeded in any of the previous fifteen years. The average prices in the first, second, third and fourth quarters of 1912 were $36/3$, $39/1$, $31/-$, and $30/4$, respectively; as compared with $33/4$, $35/5$, $32/7$ and $32/7$ for the corresponding quarters of 1911. The prices in the first two quarters were excellent, being much above those for 1911, but the prices in the last two quarters fell below those of 1911 in consequence of the restrictions occasioned by the outbreak of foot-and-mouth disease. *

The numbers of store cattle sold during 1912 were very much fewer than in previous years on

STORE CATTLE. account of the outbreak of foot-and-mouth disease. The effect, however, of the out-

break on the recorded prices was not so marked as might have been expected. The prices in the first two quarters were below those of 1911, as were also the prices in the last two quarters. The decrease in the last two quarters, however, would have been more noticeable but for the fact that in this period few animals of inferior quality were sold, and this tended to raise the *average* prices, with the exception of two year olds. The prices were—For one year old, £8 5s. 11d., as against £8 8s. 8d., in 1911; for two years old, £11 1s. 4d., being the same as in 1911; for three years old, £12 14s. 6d., as against £13 0s. 4d., in 1911; and for springers, £14 6s. 11d., as against £15 4s. 2d., in 1911.

The average price per cwt. of fat sheep sold in the Dublin Market in 1912 was 35/11, as compared

FAT SHEEP. with 34/4 in 1911. The average for last year was lower than in any of the previous nine years, with the exception of 1909 and 1911.

The price for the quarter ended 31st March was 37/4, as against 37/6 in 1911; for the quarter ended 30th June, 39/5 as against 36/8 in 1911; in the quarter ended 30th September, 28/10 as against 31/7 in 1911; and in the last quarter, 30/10, as against 30/6 in 1911.

The prices of store sheep were most unsatisfactory in 1912.

STORE SHEEP. The average price of two years old and over was only 30/5 per head, and was lower than the average price for any of the

previous nineteen years. Store sheep, one to two years, fetched, on an average, 32/4 per head, which was lower than the price in any of the previous nineteen years, except those recorded for 1902, 1896, and 1893. The average price obtained for lambs in 1912 was 24/2 per head, as compared with 24/7 in 1911, and 24/2 in 1910. The average prices for the first, second, third and fourth quarters of 1912 were, respectively, for store sheep, two years old and upwards, 30/10, 28/11, 27/4 and 31/10, as compared with 37/9, 32/3, 32/4 and 34/4 in 1911; for store sheep, one to two years old, 32/5, 35/3, 26/8 and 29/9, as compared with 33/8, 34/8, 29/- and 31/10 in 1911; and for lambs, 30/-, 25/1, 22/1 and 24/6, as compared with 31/-, 25/7, 22/11 and 24/1 in 1911.

The number of pigs in Ireland in June, 1912, was 1,323,957, as compared with 1,415,119 in June, 1911.

PORK. The numbers killed or bought dead by Irish bacon curers increased from 1,143,025

in 1910, to 1,253,197 in 1911, and to 1,416,765 in 1912; and the numbers exported from Ireland increased from 324,071 in 1910, to 342,340 in 1911, but decreased to 265,241 in 1912. The average price obtained for fresh pork in Ireland in 1912 was 55/1

per cwt., as compared with 51/- in 1911, and 60/3 in 1910. The average price for 1912 was higher than in any of the previous nineteen years, with the exception of 1909 and 1910. The prices per cwt. for the first, second, third and fourth quarters of 1912 were 49/-, 56/6, 59/8 and 55/4, respectively, as compared with 55/3, 54/3, 52/2 and 44/8 in 1911.

The prices obtained for Irish butter in 1912 were very satisfactory, the average for all kinds for the year being 106/10 per cwt., a price which was not exceeded in any of the previous nineteen years, with the exception of 1908. The returns of prices of creamery butter showed an average of 113/6 per cwt., as compared with 112/11 in 1911. Factory butter showed an average of 98/10, as compared with 95/5 in 1911, and farmers' butter an average of 98/-, as compared with 95/- in 1911. The average for creamery in the quarter ended 31st March was 130/6 per cwt., as against 110/1 in 1911; the average for factory, 117/4, as against 91/2 in 1911; and the average for farmers' butter, 116/9, as against 93/6 in 1911. During the second quarter, ended 30th June, the average price for creamery was 107/4, as against 101/10 in 1911; the price for factory, 98/2, as against 86/10 in 1911; and the price for farmers' butter, 96/2, as against 86/10 in 1911. During the quarter ended 30th September, the price of creamery was 112/4, as against 115/11 in 1911; the price of factory, 95/9, as against 96/5; and the price of farmers' butter, 96/5, as against 95/3. In the fourth quarter, the average price of creamery butter was returned at 120/9, as compared with 126/3 in 1911; the average of factory butter at 100/4, as compared with 109/3; and the average of farmers' at 98/-, as compared with 108/9 in 1911.

These are the average prices received for Irish butter in Irish markets. The prices realised for Irish, foreign and colonial butters in each week of the year 1912 at each of principal market centres of the United Kingdom, as published in certain trade journals, appear in an Appendix to this Report.

Irish eggs fetched most satisfactory prices in 1912—the average price for the year being 9/3½ per 120, the highest annual average recorded in this series of returns. For the quarter ended 31st March, the average per 120 was 9/8½, as against 9/3½ in 1911; the average for the quarter ended 30th June was 7/6½, as against 7/4; for the quarter ended 30th September, the average price was 9/4½ in 1912, as against 9/- in 1911. In the last quarter, ended 31st December, the average price in 1912 was 13/4, as against 14/2 per 120 in 1911.

Wool prices in 1912 were again satisfactory, the average for the year being 10½d. per lb., an average which was exceeded in only four of the previous nineteen years, in 1910, 1907, 1906 and 1905. The average price for the first quarter was 10½d., as

against 10½d. in 1911; in the second quarter, 10d., as against 10½d. in 1911; in the third quarter, 10¾d., being the same as in 1911; and in the last quarter, 11½d., as against 10¾d. in the corresponding quarter of 1911.

Attention is directed to the various diagrams presented at the end of this Report, as these show in a simple and clear form the bold changes which have taken place in the prices of the several commodities during the past twenty years. Diagrams are also included, showing the weekly average prices of butter and eggs, as the great variation in the summer and winter value of these articles is a matter of very practical interest.

I have the honour to be,

Sir,

Your obedient Servant,

THOMAS BUTLER,

Superintendent of Statistics,

and Intelligence Branch.

(s) The towns from which Returns were received during the years 1905-1912 were:—Leinster—Dublin; Munster—Cork, Limerick, and Waterford; Ulster—Belfast and Londonderry; Connaught—Galway.

NOTE.—The prices of early potatoes are taken into account in the above table. These prices do not appreciably affect the averages shown as explained on page 13 of this report, but considerably affect the highest prices shown, especially those for the year 1905 and subsequent years.

TABLE V.—HAY. Prices per 112 lbs.
